Kamenitza

Heartfelt invitation

Camera

REALISTIC AND CINEMATIC

- Our camera work will be a blend of handheld realism and cinematic beauty. We're observers, capturing life as it unfolds, yet doing so with an artistic eye that elevates the everyday into something extraordinary. The camera is our tool to bring the viewer into the heart of the story, making them feel part of the world we're creating.

- Camera will be very sensitive to the detail. And will describe the world with one poetic tenderness more usual for the art-house cinema than the commercial world.

- Camera will be most of the time handheld.

- The product and beauty shots will be high speed.

Light

CAPTURING LIFE IN ITS TRUE COLORS

- Lighting will be as natural and engaging as our stories. We're looking for interesting lighting situations that add depth and dimension to our scenes. Whether it's the soft glow of a sunset during a family barbecue or the bright light of a kitchen on a Sunday morning, our lighting will enhance the realism and emotional impact of each moment.
