Light

CAPTURING LIFE IN ITS TRUE COLORS

- Lighting will be as natural and engaging as our stories. We're looking for interesting lighting situations that add depth and dimension to our scenes. Whether it's the soft glow of a sunset during a family barbecue or the bright light of a kitchen on a Sunday morning, our lighting will enhance the realism and emotional impact of each moment.

WORM COLORS

PROVOKING WORM FEELINGS

- Our color scheme will be fresh and vivid, with a special emphasis on green, reflecting Kamenitza's brand identity. We'll use color to evoke emotions, set the mood, and bring our scenes to life. From the lush green of a garden to the warm hues of a family dinner, our colors will be a visual feast, as inviting as the beer we're celebrating.
