In each location, our focus will be on authenticity and visual interest. We want to capture the essence of Bulgaria, its people, and its culture, creating a tapestry of images that tells a compelling story. By doing so, we aim to create a campaign that not only promotes Kamenitza but also celebrates the rich and diverse tapestry of Bulgarian life.

Camera

REALISTIC AND CINEMATIC

- Our camera work will be a blend of handheld realism and cinematic beauty. We're observers, capturing life as it unfolds, yet doing so with an artistic eye that elevates the everyday into something extraordinary. The camera is our tool to bring the viewer into the heart of the story, making them feel part of the world we're creating.

- Camera will be very sensitive to the detail. And will describe the world with one poetic tenderness more usual for the art-house cinema than the commercial world.

- Camera will be most of the time handheld.

- The product and beauty shots will be high speed.
